Experience

Aclara | UX Design Intern

June 2019 - September 2019

I developed the design for an appointment scheduling portal for customers.

I also helped implement the UI refresh for an internal application utilized by the entire company.

Finally, I developed the point system and various visual elements for the gamification of the technician experience.

SOARING Project | Research Assistant

January 2018 - March 2018

I utilized user personas to create designs for technology that aids health information management.

I led a group that designed technology that improved accessibility, usability, and customization for older patients.

I also created videos that helped present the designs to the potential users during participatory design sessions.

HCDE Student Association | Treasurer

January 2018 - March 2018

I managed funds allocated by the department for use in various functions, events, and initiatives.

In addition, I planned and executed activities and gatherings focused on promoting community growth and networking.
