Experience

Aclara | UX Design Intern
June 2019 - September 2019

I developed the design for an appointment scheduling portal for customers by utilizing the entire UX Design process from research to development.

I also helped implement the UI refresh for an internal application utilized by the entire company.

Finally, I aided in gamifying the installation technician's experience by developing the point system and various visual elements such as avatars and leaderboards.

SOARING Project | Research Assistant
January 2018 - March 2018

I utilized user personas to create designs for technology that would help older patients better manage their health information.

I led a group that focused on designing technology that improved accessibility, usability, and customization for older patients.

I also created video media to present the designs to participants during participatory design/feedback sessions with the intended users

HCDE Student Association | Treasurer
January 2018 - March 2018

I managed funds allocated by the department for use in various functions, events, and intiatives.

In addition, I planned and executed activities and gatherings focused on promoting community growth and networking.
